**5. Valuation Date:**

The analysis of the Fair Value of the equity of the company has been carried out as on 28<sup>th</sup> January 2023.

**6. Valuation Standard:**

The report has been prepared in compliance with the Valuation Standards prescribed in rule 18 of the Companies (Registered Valuers and valuation) Rules 2017 and International Valuation Standards (IVS) prescribed as given below:

- IVS 500 – Financial Instruments
- IVS 105 - Valuation Approaches and Methods
- IVS 104 – Bases of Value

**7. Valuation Methodology and Approach: (Bases of Value)**

The standard of value used in the Analysis is “Fair Value”, which is often defined as the price, in terms of cash or equivalent, that a buyer could reasonably be expected to pay, and a seller could reasonably be expected to accept, if the business were exposed for sale on the open market for a reasonable period of time, with both buyer and seller being in possession of the pertinent facts and neither being under any compulsion to act.

The results of this exercise could vary significantly depending upon the basis used, the specific circumstances and professional judgment of the valuer. In respect of going concern the following valuation techniques have necessarily considered.

**1. Asset Approach – NAV (Net Asset Value Approach):**

The value arrived at under this approach is based on the audited financial statements of the business and may be defined as Shareholders’ Funds or Net Assets owned by the business. The NAV method is generally used as the minimum break-up value for the transaction since this methodology ignores the future return on the assets that can produce for a certain period of operation in the future and is calculated using historical accounting data that does not reflect how much the business is worth to someone who may buy it as a going concern.

Since the business of the Company is Not a capital intensive and having only financial assets, the NAV method is not considered for valuation.

**2. Market Approach:**

**(i) Comparable Company Market Multiple Method:**

Under this methodology, market multiples of comparable listed companies are computed and applied to the business being valued in order to arrive a multiple based valuation. Since the proposed company is a listed company this method

(8)

would have been considered, however valuation rules of SEBI ICDR regulations for listed companies applied, this method is not considered

(ii) **Comparable Transactions Multiple Method:**

This approach is somewhat similar to the market multiples approach except that the sales and EBITDA multiples of reported transactions in the same industry in the recent past are applied to the sale and EBITDA of the business being valued.

Since valuation rules of SEBI ICDR regulations for listed companies applied, this method is not considered

(iii) **Market Traded Price Method:**

Valuation of Equity shares under market price approach is dependent upon the price at which shares of the company are quoted at the listed Stock Exchange. More the volume, more authentic is price. Since the company is a BSE listed company, this method is being considered for the valuation of shares based on SEBI ICDR Regulations

**2. Share Holders Fund Based Approach:**

Share Holders Fund Based Approach is the simplest form of value of Equity Shares of the company. This is the value of total fund available to investors (Share Holders) ie. Equity Capital and Reserves and surplus available to shareholders.

Since valuation rules of ICDR regulations for listed companies applied, this method is not considered

**3. Income Approach: (Discounted Free Cash Flows – DFCF):**

DFCF uses the future free cash flows of the company discounted by the firm's weighted average cost of capital (the average cost of all the capital used in the business, including debt and equity), plus a risk factor measured by beta, to arrive at the present value.

Beta is an adjustment that uses historic stock market data to measure the sensitivity of the company's cash flow to market indices, for example, through business cycles.

The DFCF method is a strong valuation tool, as it concentrates on cash generation potential of a business. This valuation method is based on the capability of a company to generate cash flows in the future. The free cash flows are projected for a certain number of years and then discounted at a discount rate that reflects a

(9)

APC

company's cost of capital and the risk associated with the cash flows it generates. The DCF analysis is based mainly on the following elements:

- Projection of financial statements (key value driving factors)
- The cost of capital to discount the projected cash flows

Since valuation rules of ICDR regulations for listed companies applied, this method is not considered.

#### 8. Summary Analysis – Value assignment.

#### **11. Caveats, Limitations and Disclaimers and Distribution of Report**

- iv. While my work has involved an analysis of financial information and accounting records, the engagement does not include an audit in accordance with generally accepted auditing standards of the client's existing business records. Accordingly, I assume no responsibility and make no representations with respect to the accuracy or completeness of any information provided by the Company. My report is subject to the scope and limitations detailed hereinafter. As such the report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein and in the context of the purpose for which it is made.
- ii. The valuation of companies and businesses is not a precise science and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgment. There is, therefore, no indisputable single value and we normally express our opinion on the value as falling within a likely range. However, as [purpose] requires the expression of a single value, I have adopted a value at the mid-point of our valuation range and consider our value/range of values to be both reasonable and defensible based on the information available to us, others may place a different value on the company/business.

- iii. The actual market price achieved may be higher or lower than our estimate of [value/value range] depending upon the circumstances of the transaction (for example the competitive bidding environment), the nature of the business (for example the purchaser's perception of potential synergies). The knowledge, negotiating ability and motivation of the buyers and sellers and the applicability of a discount or premium for control will also affect actual market price achieved. Accordingly, my value conclusion will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. We also emphasize that our opinion is not the only factor that should be considered by the parties in agreeing the transaction price.
- iv. An analysis of such nature is necessarily based on the prevailing stock market, financial, economic and other conditions in general and industry trends in particular as in effect on, and the information made available to us as of, the date hereof. Events occurring after the date hereof may affect this report and the assumptions used in preparing it, and we do not assume any obligation to update, revise or reaffirm this Report.
- v. The ultimate analysis will have to be tempered by the exercise of judicious discretion by the RV and judgment taking into account the relevant factors. There will always be several factors, e.g. management capability, present and prospective competition, yield on comparable securities, market sentiment, etc. which may not be apparent from the face of the B/S but could strongly influence the value.
- vi. Unavailability of information as of valuation date: Please note that the Fair Value of assets of the company have been performed as of an earlier date based on the provisional unaudited balance sheet of [company] provided by management as of the valuation date. The management has also confirmed that there has not been any material change in the financials of subsidiaries and associates since the last available financial statements.
- vii. In the course of the valuation, I have provided with both written and verbal information. I have however, evaluated the information provided to us by the Company through broad inquiry, analysis and review but have not carried out a due diligence or audit of the information provided for the purpose of this engagement. My conclusions are based on the assumptions, forecasts and other information given by/on behalf of the Company.
- viii. We are independent of the client/company and have no current or expected interest in the Company or its assets. The fee paid for our services in no way influenced the results of our analysis.
- ix. Our report is meant for the purpose mentioned above and should not be used for any purpose other than the purpose mentioned therein. The Report should not be copied or reproduced without obtaining our prior written approval for any purpose other than the purpose for which it is prepared.

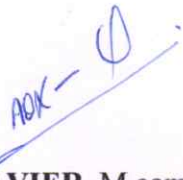

## **DISTRIBUTION OF REPORT:**

The analysis is confidential and has been prepared exclusively for valuation of equity shares of the company for further issue of Equity share. It should not be used, reproduced or circulated to any other person for any purpose other than as mentioned about, whole or in part, without the prior written consent of Valuer.
