Chairman's Message

Dear Shareholders,

It gives me immense pleasure to share our 37th Annual Report for the Financial year ending March 31, 2023. As you are aware, the Financial Year ended March 2023, witnessed turbulent times both in domestic and global economy. Though there was marked improvement in the Covid Pandemic situation in the country, wide volatilities were seen in oil and other commodity prices mainly due to the Ukraine war and various other global factors. All these factors have led to elevated inflation levels in the country and the resultant increase in interest rates.

I am pleased to inform you that despite headwinds in the financial markets as stated above, we had substantially higher disbursements under the loan portfolio at Rs. 7897.57 lakh which led to a total AUM of Rs. 6106.41 as on 31/3/2023 as against the AUM of Rs. 3602.84 Lakh as on 31/3/2022, revenue from operations has recorded an increase from Rs. 625.27 lakh in Financial Year 2022 to Rs. 1211.10 lakh in the Financial Year 2023. Also, the EBITDA has increased from Rs. 420.69 Lakh in the Financial year 2022 to Rs.709.60 in the Financial year 2023. The net profit in the Financial year 2023 is 25.65 Lakh. On the asset quality, the Gross and Net NPA was 0.61% and 0.37% respectively as on 31/03/2023.

Our Company's collective efforts through the diverse range of offerings and an extensive network of branches that are digitally enabled across the country helps differentiate us. At present, the company has various portfolios such as Gold Loan, Auto Loan, Micro Finance, Traders Loan etc. We are actively increasing our footprints in Kerala and metro cities like Mumbai, Bangalore and other State capitals. Today, we have 37 branches of which 16 are in Mumbai and 10 are in different districts of Kerala and 11 are in Karnataka. We are expanding the Branch network in a phased manner. With the expansion plans in place, we expect bright prospects for the company through higher loan disbursements, revenue and profits going forward.

I would like to express our gratitude to our shareholders for their unrelenting support in the affairs of the company. I would also like to thank all our employees for their dedication and support in taking the organisation to greater heights. We thank our other stakeholders like Customers, Bankers and business associates who are continuously engaged with the organization.

We will continue to pursue our mission of creating values through inclusiveness and exclusivity. I have no doubt that with all your continued support we will scale new heights in the years to come. On behalf of the board, I once again thank each and every one of you for reposing your confidence in the Company and look forward to your continued support at all times in the days ahead.

THE INSTRUCTIONS OF SHAREHOLDERS FOR REMOTE E-VOTING AND E-VOTING DURING AGM/EGM AND JOINING MEETING THROUGH VC/OAVM ARE AS UNDER:

- (i) The voting period begins on <21st August, 2023 at 9.00 AM> and ends on <23rd August, 2023 at 5.00 PM>. During this period shareholders of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date Thursday, 17th August, 2023 may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.

- (ii) Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting venue.
- (iii) Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09.12.2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

- (iv) In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. Shareholders are advised to update their mobile number and email Id in their demat accounts in order to access e-Voting facility.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Directors are pleased to present the Management Discussion and Analysis Report for the year ended 31st March, 2023.

The Management Discussion and Analysis have been included in consonance with the Code of Corporate Governance as approved by The Securities and Exchange Board of India (SEBI). Investors are cautioned that these discussions contain certain forward-looking statements that involve risk and uncertainties including those risks which are inherent in the Company's growth and strategy. The company undertakes no obligation to publicly update or revise any of the opinions or forward looking statements expressed in this report consequent to new information or developments, events or otherwise.

The management of the company is presenting herein the overview, opportunities and threats, initiatives by the Company and overall strategy of the company and its outlook for the future. This outlook is based on management's own assessment and it may vary due to future economic and other future developments in the country.

Global Economy

Steering through challenges in the previous year, the global economy has positioned itself with better prospects this year. Post Covid-19 pandemic, the global economy is gradually recovering from a series of disruptions with supply-chain disruptions easing and energy and food markets stabilising after the Russia-Ukraine crisis. Additionally, most central banks have tightened monetary policy extensively and synchronously, which is expected to result in inflation, the most pressing issue in 2022, moving back towards its target range. According to the International Monetary Fund's latest forecast, global growth is expected to reach 2.8% in 2023 and will rise to 3.0% in 2024.

Outlook

The global economy is currently bracing itself for slower growth, primarily due to the disruptive impact of the Russia-Ukraine conflict and the tightening of monetary policy. These factors have led to significant supply-side disruptions, creating challenges for economies around the world. However, amidst this uncertain outlook, certain economies are expected to exhibit resilience and drive global growth. The Union Budget outlined measures to increase capital spending, emphasis on infrastructure development, promote sustainable and environment friendly activities and strengthen financial markets. These policies are expected to stimulate job creation and economic growth in India. With a strong emphasis on macroeconomic stability in recent years, the Indian economy is likely to benefit from these actions in the coming years.

Indian Economy

The Indian economy has demonstrated an exceptional performance during FY 2022-23, positioning itself as one of the fastest-growing economies. According to the International Monetary Fund (IMF), India is expected to maintain its position as a more favourable contributor to the global economy, contributing around 15% to global economic expansion. The Union Budget FY 2023-24 aimed at enhancing the nation's positioning with increased capital expenditure to Rs. 10 Lakh crore, marking an increment of 33% in capital outlay as compared to FY 2022-23. The government's focus on capital expenditure, strong manufacturing capacity utilisation, double-digit credit growth, and moderation in commodity prices are likely to enhance manufacturing and investment activities. This is highly optimistic for key industries like manufacturing, infrastructure and healthcare coupled with the Government's introduction of various measures to support economic growth.

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

The financial institutions have a vital role in promoting stability and implementing regulatory measures to support households and businesses, especially amid economic crises. Non-Banking Financial Companies (NBFCs) have started to compete with traditional banks by offering an array of financial services such as loans, credit facilities and investment products. NBFCs have a crucial role in providing credit to segments of the economy that are usually underserved by mainstream banks, such as low-income households, small and medium-sized businesses and rural communities. Their lending criteria is more amenable to the segments they operate in, while being quicker in taking credit decisions than banks.

Customers in recent years have shown an inclination towards NBFCs due to their nimbler and more adaptable services to add to their increasing geographical reach. NBFCs are increasingly making use of technology to streamline lending processes and provide personalised customer experiences, such as online applications, digital loan disbursements and repayments. Additionally, the expansion of the economy and growing middle class increase the need for financial services, creating a favourable environment for NBFCs to grow. Regulatory support and government efforts towards financial inclusion, especially in rural and semi-urban areas, also offer an opportunity for NBFCs to expand their reach where traditional banking channels may not have reached. It is expected to see a gradual and sustained improvement in new business for NBFC's in the coming year. Some of the sectors which have been lagging in revenue recovery in the previous years are expected to show improvements this year. The Company sees the good opportunity and development in coming years.

2. OPPORTUNITY AND THREATS

Opportunities

Non-banking financial companies (NBFCs) have the potential to seize growth opportunities by catering to underserved segments of the population, such as small businesses and low-income households. Embracing technology to streamline their operations and expand their customer base, collaborating with fintech companies and government initiatives promoting financial inclusion and digital payments further create room for NBFCs to explore.

NBFCs have played a significant role in boosting credit flow to MSMEs, especially in underbanked areas of the country. These companies have adopted innovative tools, unconventional risk modelling and personalised offerings to cater to the specific requirements of small businesses. Additionally, NBFCs have leveraged technology for data analytics and streamlined their processes for faster disbursement of credit.

Threats & Concerns

NBFCs must also contend with several threats, such as borrower defaults, competitive pressure from traditional banks and fintech startups and regulatory changes that can impact their operations and profitability. Moreover, rising interest rates and inflation leading to an increase in the cost of funds for NBFCs poses pressure on margins. To mitigate risks, NBFCs may consider prioritising strong underwriting practices, diversifying their portfolios and enhancing their risk management systems to minimize borrower default risks.

To the Members of Supra Pacific Management Consultancy Limited Report on the Audit of Financial Statements

Opinion

We have audited the accompanying financial statements of Supra Pacific Management Consultancy Limited ('the Company'), which comprise the Balance Sheet as at 31st March, 2023, the Statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity and the Statement of Cash flows for the year then ended and the notes to the financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us the aforesaid financial statements give the information required by the Companies Act 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("IND AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standard of Auditing (SAs) specified under section 143(10) of the Act. Our responsibility under those SAs are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder and we have fulfilled our ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matter is a matter that, in our professional judgement, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be key audit matter to be communicated in our report.

Key Audit Matter	Auditor's Response
Impairment of carrying value of loans and advances: Management estimates impairment provision using Expected Credit Loss Model (ECL) for the loan exposure. Measurement of loan impairment involves application of significant judgement by the management. The most significant judgements are: <ul style="list-style-type: none"> ▶ Timely identification and classification of impaired loans ▶ Determination of probability of defaults (PD) and estimation of loss given defaults (LGD) based on the value of collaterals and relevant factors The Company doesn't have credit loss history and has assigned PD to each borrower on the basis of Company's internal rating model on various rating agencies database and LGD are based on the value of collaterals and relevant factors. <p>The estimation of Expected Credit Loss (ECL) on financial instruments involve significant judgements and estimates. Following are the points with increased level of audit focus:</p> <ul style="list-style-type: none"> ▶ Classification of assets to stage 1,2 or 3 using criteria in accordance with Ind AS 109 ▶ Accounting interpretations and data used to build and run the models 	Principal audit procedures performed: We examined Board policy approving methodologies for computation of ECL that address policies, procedures and controls for assessing and measuring credit risk on all lending exposures, commensurate with the size, complexity and risk profile specific to the Company. The parameters and assumptions used and their rationale and basis are clearly documented. <p>We evaluated the design and operating effectiveness of controls across the processes relevant to determination of ECL, including the judgements and estimates.</p> <p>These controls, among others, included controls over the allocation of assets into stages including management's monitoring of stage effectiveness, model monitoring including the need for post model adjustments, model validation, credit monitoring, individual provisions and production of journal entries and disclosures.</p> <p>We tested the completeness of loans and advances included in the Expected Credit Loss calculation as on 31 March 2023 by reconciling it with the balances as per loan balance register as on the date.</p> <p>We tested assets in stage 1,2 and 3 on sample basis to verify that they were allocated to the appropriate stage.</p> <p>For samples of exposure, we tested the appropriateness of determining Exposure at Default (EAD), PD and LGD.</p>

Other Information

- The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditor's report thereon. The annual report is expected to be made available to us after the date of this auditor's report.
- Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.
- In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- When we read the management report, if we conclude that there is a material misstatement therein, we are required to communicate the matters to those charged with governance as required under SA 720 'The Auditor's responsibilities Relating to Other Information'

Management's responsibility for the financial statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, and cash flows and changes in equity of the Company in accordance with the IND AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the company to express an opinion on the financial statements.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of atmost significance in the audit of financial statements of the current year and are therefore the key audit matter. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

A. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

B. As required by Section 143 (3) of the Act, based on our audit we report that:

1. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
2. In our opinion, proper books of account as required by law have been kept by the company so far as it appears from our examination of those books.
3. The company does not have any branches and so the provisions of section 143(8) are not applicable to the company.
4. The Balance Sheet, the Statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity and the Statement of Cash flows dealt with by this Report are in agreement with the books of account.
5. In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
6. On the basis of the written representations received from the directors as on 31st March, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2023 from being appointed as a director in terms of Section 164 (2) of the Act.

7. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in 'Annexure B'. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
8. With respect to the other matter to be included in the auditor's report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the company to its directors during the year is in accordance with the provisions of section 197 of the Act.
9. With respect to the matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanation given to us:
- i. The Company does not have any pending litigations which would impact its financial position in its financial statements.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the company;
 - iv.
 - (a) The Management has represented that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries
 - (b) The Management has represented, that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been received by the Company from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries
 - (c) Based on the audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under the sub-clause (a) and (b) contain any material misstatement.
 - v. Since the Company has not declared or paid any dividend during the year, the question of commenting on whether dividend declared or paid is in accordance with Section 123 of the Companies Act, 2013 does not arise.
- C. Proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company with effect from April 1, 2023, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended March 31, 2023.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF SUPRA PACIFIC MANAGEMENT CONSULTANCY LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Supra Pacific Management Consultancy Limited ("the Company") as of 31st March, 2023 in conjunction with our audit of the IND AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "guidance note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2023 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes to the Financial Statements for the year ended 31 March 2023

1 Corporate Information

Supra Pacific Management Consultancy Limited (Supra Pacific or 'the Company') is a public limited company domiciled in India and incorporated on 12th April 1986 in Mumbai, Maharashtra. Its shares are listed on BSE Limited. The Company is a Non-Banking Finance Company ('NBFC'), which provides a wide range of fund based services including two wheeler loans, gold loans, Micro finance etc. The Company is a Non-Systemically Important Non-Deposit taking NBFC (NBFC-ND). The Company is registered with the Reserve Bank of India (RBI). The Company's registered office is situated at No: 3, Ground Floor, Building No: 12, Amar Niketan Nr. JB Nagar Post Office, JB Nagar, Andh eri East NA Mumbai Mumbai City MH 400059, while its corporate office is located in Ernakulam, Kerala.

The registration details are as follows:

Reserve Bank of India Registration no : 13. 01238

Corporate Identity Number (CIN) : L74140MH1986PLC039547

2 Basis of preparation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 ('the Act') read together with the Companies (Indian Accounting Standards) Rules, 2021, as amended from time to time, other relevant provisions of the Act and the RBI guidelines/regulations to the extent applicable on an accrual basis.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and financial liabilities that are measured at fair value.

The financial statements are presented in INR, which is also the Company's functional currency and all values are rounded to the nearest Lakh, except when otherwise indicated.

3 Presentation of financial statement

The Company presents its balance sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented separately. Financial assets and financial liability are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- i. The normal course of business
- ii. The event of default
- iii. The event of insolvency or bankruptcy of the Company and/or its counterparties.

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

4 Statement of compliance

These separate financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and the generally accepted accounting principles as referred to in paragraph 2 "Basis of Preparation" above.

Significant accounting policies (also refer to note 2 above)

5.1 Financial instruments

(i) Classification of financial instruments

The Company classifies its financial assets into the following measurement categories:

1. Financial assets to be measured at amortised cost
2. Financial assets to be measured at fair value through other comprehensive income
3. Financial assets to be measured at fair value through profit or loss account

The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets.

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The business model is assessed on the basis of aggregated portfolios based on observable factors. These factors include:

- ▶ Reports reviewed by the entity's key management personnel on the performance of the financial assets
- ▶ The risks impacting the performance of the business model (and the financial assets held within that business model) and its management thereof
- ▶ The compensation of the managing teams (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- ▶ The expected frequency, value and timing of trades.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account.

The Company also assesses the contractual terms of financial assets on the basis of its contractual cash flow characteristics that are solely for the payments of principal and interest on the principal amount outstanding.

'Principal' is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial

In making this assessment, the Company considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

The Company classifies its financial liabilities at amortised costs unless it has designated liabilities at fair value through the profit and loss account or is required to measure liabilities at fair value through profit or loss such as derivative liabilities.

(ii) Financial assets measured at amortised cost

These Financial assets comprise bank balances, loans, investments in debt securities and other financial assets.

Financial Assets with contractual terms that give rise to cash flows on specified dates, and represent solely payments of principal and interest on the principal amount outstanding; and are held within a business model whose objective is achieved by holding to collect contractual cash flows are measured at amortised cost.

These financial assets are initially recognised at fair value plus directly attributable transaction costs and subsequently measured at amortised cost. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability.

(iii) Financial assets measured at fair value through other comprehensive income**Debt instruments**

Investments in debt instruments are measured at fair value through other comprehensive income where they have:

- a) contractual terms that give rise to cash flows on specified dates, that represent solely payments of principal and interest on the principal amount outstanding; and
- b) are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

These debt instruments are initially recognised at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income (a separate component of equity). Impairment losses or reversals, interest revenue and foreign exchange gains and losses are recognised in profit and loss. Upon disposal, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to the statement of profit and loss. As at the reporting date the Company does not have any financial instruments measured at fair value through other comprehensive income.

Equity instruments

Investment in equity instruments are generally accounted for as at fair value through the profit and loss account unless an irrevocable election has been made by management to account for at fair value through other comprehensive income. Such classification is determined on an instrument-by-instrument basis.

(iv) Items at fair value through profit or loss

Items at fair value through profit or loss comprise:

- Investments (including equity shares) held for trading;
- Items specifically designated as fair value through profit or loss on initial recognition; and
- debt instruments with contractual terms that do not represent solely payments of principal and interest.

Financial instruments held at fair value through profit or loss are initially recognised at fair value, with transaction costs recognised in the statement of profit and loss as incurred. Subsequently, they are measured at fair value and any gains or losses are recognised in the statement of profit and loss as they arise.

Financial instruments held for trading

A financial instrument is classified as held for trading if it is acquired or incurred principally for selling or repurchasing in the near term, or forms part of a portfolio of financial instruments that are managed together and for which there is evidence of short-term profit taking, or it is a derivative not designated in a qualifying hedge relationship.

Trading derivatives and trading securities are classified as held for trading and recognised at fair value.

(vi) Debt securities and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and transaction costs that are an integral part of the Effective Interest Rate (EIR).

(vii) Recognition and derecognition of financial assets and liabilities

A financial asset or financial liability is recognised in the balance sheet when the Company becomes a party to the contractual provisions of the instrument, which is generally on trade date. Loans and receivables are recognised when cash is advanced (or settled) to the borrowers. Financial assets at fair value through profit or loss are recognised initially at fair value. All other financial assets are recognised initially at fair value plus directly attributable transaction costs.

The Company derecognises a financial asset when the contractual cash flows from the asset expire or it transfers its rights to receive contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability. A financial liability is derecognised from the balance sheet when the Company has discharged its obligation or the contract is cancelled or expires.

(viii) Impairment of financial assets

The Company recognises impairment allowance for expected credit loss on financial assets held at amortised cost.

The Company recognises loss allowances (provisions) for expected credit losses on its financial assets (including non-fund exposures) that are measured at amortised costs or at fair value through other comprehensive income account.

The Company applies a three-stage approach to measuring expected credit losses (ECLs) for the following categories of financial assets that are not measured at fair value through profit or loss:

- debt instruments measured at amortised cost and fair value through other comprehensive income;
- loan commitments.

No ECL is recognised on equity investments.

Financial assets migrate through the following three stages based on the change in credit risk since initial recognition:

Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised.

Stage 2: Lifetime ECL – not credit impaired

For exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired, a lifetime ECL (i.e. reflecting the remaining lifetime of the financial asset) is recognised.

Stage 3: Lifetime ECL – credit impaired

Exposures are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For exposures that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than the gross carrying amount.

Determining the stage for impairment

At each reporting date, the Company assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose.

This includes quantitative and qualitative information and also, forward-looking analysis.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the loss allowances reverts from lifetime ECL to 12-months ECL.

The loss allowances for these financial assets is based on a 12-months ECL.

When an asset is uncollectible, it is written off against the related allowance. Such assets are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off reduce the amount of the allowances in the profit and loss statement.

The Company assesses whether the credit risk on an exposure has increased significantly on an individual or collective basis. For the purposes of a collective evaluation of impairment, financial instruments are grouped on the basis of shared credit risk characteristics, taking into account instrument type, credit risk ratings, date of initial recognition, remaining term to maturity, industry, geographical location of the borrower and other relevant factors.

Measurement of ECLs

ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive. The Company has grouped its various financial assets in to pools containing loans bearing homogeneous risks characteristics. The probability of default for the pools are computed based on the historical trends, adjusted for any forward looking factors. Similarly the Company computes the Loss Given Default based on the recovery rates.
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate.
- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Company if the commitment is drawn down and the cash flows that the Company expects to receive.
- Financial guarantee contracts: as the expected payments to reimburse the holder less any amounts that the Company expects to recover.

ECL on Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the balance sheet, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit and loss upon derecognition of the assets. As at the reporting date the Company does not have any debt instruments measured at fair value through OCI.

Collateral Valuation

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as movable and immovable assets, guarantees, etc. However, the fair value of collateral affects the calculation of ECLs. To the extent possible, the Company uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as vehicles, is valued based on data provided by third parties or management judgements.

Collateral repossessed

In its normal course of business whenever default occurs, the Company may take possession of properties or other assets in its retail portfolio and generally disposes such assets through auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, assets under legal repossession processes are not recorded on the balance sheet.

(ix) Write-offs

The Company reduces the gross carrying amount of a financial asset when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subjected to write-offs. Any subsequent recoveries against such loans are credited to the statement of profit and loss.

(x) Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. The Financial assets and liabilities are presented in ascending order of their liquidity. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. No such instances of transfers between levels of the fair value hierarchy were recorded during the reporting period.

Difference between transaction price and fair value at initial recognition

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e. the fair value of the consideration given or received) unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets. When such evidence exists, the Company recognises the difference between the transaction price and the fair value in profit or loss on initial recognition (i.e. on day one).

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Company recognises the difference between the transaction price and fair value in net gain on fair value changes. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

5.2 Revenue from operations

(i) Interest Income

Interest income is recognised by applying the Effective Interest Rate (EIR) to the gross carrying amount of financial assets measured through amortised cost method.

The EIR in case of a financial asset is computed

- a. As the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset.
- b. By considering all the contractual terms of the financial instrument in estimating the cash flows
- c. Including all fees received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Any subsequent changes in the estimation of the future cash flows is recognised in interest income with the corresponding adjustment to the carrying amount of the assets.

(iii) Fees & Commission Income

Fees and commissions other than those which forms part of EIR are recognised when the Company satisfies the performance obligation, at fair value of the consideration received or receivable based on a five-step model as set out below:

Step 1: Identify contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Company allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

Step 5: Recognise revenue when (or as) the Company satisfies a performance obligation.

Processing fee which is not form part of effective interest rate has been recognised as and when it is accrue.

(iv) Net gain on Fair value changes

Any differences between the fair values of financial assets classified as fair value through the profit or loss, held by the Company on the balance sheet date is recognised as an unrealised gain / loss. In cases there is a net gain in the aggregate, the same is recognised in "Net gains on fair value changes" under Revenue from operations and if there is a net loss the same is disclosed under "Expenses" in the statement of Profit and Loss.

Similarly, any realised gain or loss on sale of financial instruments measured at FVTPL and debt instruments measured at FVOCI is recognised in net gain / loss on fair value changes. As at the reporting date the Company does not have any financial instruments measured at FVTPL and debt instruments measured at FVOCI.

However, net gain / loss on derecognition of financial instruments classified as amortised cost is presented separately under the respective head in the Statement of Profit and Loss.

5.3 Expenses

(i) Finance costs

Finance costs represents Interest expense recognised by applying the Effective Interest Rate (EIR) to the gross carrying amount of financial liabilities other than financial liabilities classified as FVTPL.

The EIR in case of a financial liability is computed

- As the rate that exactly discounts estimated future cash payments through the expected life of the financial liability to the gross carrying amount of the amortised cost of a financial liability.
- By considering all the contractual terms of the financial instrument in estimating the cash flows
- Including all fees paid between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Any subsequent changes in the estimation of the future cash flows is recognised in interest income with the corresponding adjustment to the carrying amount of the assets.

Interest expense includes issue costs that are initially recognized as part of the carrying value of the financial liability and amortized over the expected life using the effective interest method. These include fees and commissions payable to advisers and other expenses such as external legal costs, Rating Fee etc, provided these are incremental costs that are directly related to the issue of a financial liability.

(ii) Retirement and other employee benefits

Short term employee benefit

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. These benefits include short term compensated absences such as paid annual leave. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised as an expense during the period. Benefits such as salaries and wages, etc. and the expected cost of the bonus/ex-gratia are recognised in the period in which the employee renders the related service.

Post-employment employee benefits

Defined contribution schemes

All the employees of the Company are entitled to receive benefits under the Provident Fund and Employees State Insurance scheme, defined contribution plans in which both the employee and the Company contribute monthly at a stipulated rate. The Company has no liability for future benefits other than its annual contribution and recognises such contributions as an expense in the period in which employee renders the related service. If the contribution payable to the scheme for service received before the Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the Balance Sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Defined Benefit schemes

The Company provides for the gratuity, a defined benefit retirement plan covering all employees. The plan provides for lump sum payments to employees upon death while in employment or on separation from employment after serving for the stipulated years mentioned under 'The Payment of Gratuity Act, 1972'. The present value of the obligation under such defined benefit plan is determined based on actuarial valuation, carried out by an independent actuary at each Balance Sheet date, using the Projected Unit Credit Method, which recognizes each period of service as giving rise to an additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan are based on the market yields on Government Securities as at the Balance Sheet date.

Net interest recognized in profit or loss is calculated by applying the discount rate used to measure the defined benefit obligation to the net defined benefit liability or asset. The actual return on the plan assets above or below the discount rate is recognized as part of re-measurement of net defined liability or asset through other comprehensive income. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, attrition rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, these liabilities are highly sensitive to changes in these assumptions. All assumptions are reviewed annually.

Re-measurement, comprising of actuarial gains and losses and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit and loss in subsequent periods.

Other long-term employee benefits

Company's liabilities towards compensated absences to employees are accrued on the basis of valuations, as at the Balance Sheet date, carried out by an independent actuary using Projected Unit Credit Method. Actuarial gains and losses comprise experience adjustments and the effects of changes in actuarial assumptions and are recognised immediately in the Statement of Profit and Loss.

The Company presents the Provision for compensated absences under provisions in the Balance Sheet.

(iii) Other income and expenses

All Other income and expense are recognized in the period they occur.

(iv) Impairment of non-financial assets

The carrying amount of assets is reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets, net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

(v) Taxes**Current Tax**

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from, or paid to, the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date in the countries where the Company operates and generates taxable income. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax assets and liabilities are recognised for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are only recognised for temporary differences, unused tax losses and unused tax credits if it is probable that future taxable amounts will arise to utilise those temporary differences and losses. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities are realised

Minimum Alternate Tax (MAT)

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that it is probable that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the MAT Credit Entitlement asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

Goods and services tax /value added taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the goods and services tax/value added taxes paid, except:

- i. When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii. When receivables and payables are stated with the amount of tax included

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

5.4 Foreign currency translation**(i) Functional and presentational currency**

The standalone financial statements are presented in Indian Rupees which is also functional currency of the Company and the currency of the primary economic environment in which the Company operates.

(ii) Transactions and balances**Initial recognition:**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Conversion:

Monetary assets and liabilities denominated in foreign currency, which are outstanding as at the reporting date, are translated at the reporting date at the closing exchange rate and the resultant exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured at historical cost in a foreign currency are translated using the spot exchange rates as at the date of recognition.

5.5 Cash and cash equivalents

Cash and cash equivalents comprise the net amount of short-term, highly liquid investments that are readily convertible to known amounts of cash (short-term deposits with an original maturity of three months or less) and are subject to an insignificant risk of change in value, cheques on hand and balances with banks. They are held for the purposes of meeting short-term cash commitments (rather than for investment or other purposes).

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

5.6 Property, Plant and equipment (PPE)

Property, plant and equipment (PPE) are measured at cost less accumulated depreciation and accumulated impairment, (if any). The total cost of assets comprises its purchase price, freight, duties, taxes and any other incidental expenses directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the management. Changes in the expected useful life are accounted for by changing the amortisation period or methodology, as appropriate, and treated as changes in accounting estimates.

Subsequent expenditure related to an item of tangible asset are added to its gross value only if it increases the future benefits of the existing asset, beyond its previously assessed standards of performance and cost can be measured reliably. Other repairs and maintenance costs are expensed off as and when incurred.

Depreciation is calculated using the Straight Line Method (SLM) to write down the cost of property and equipment to their residual values over their estimated useful lives. Land is not depreciated.

The estimated useful lives are, as follows:

Particulars	Useful life estimated by Company
Computer	
- End User equipment	3 years
- Server	6 years
Furniture & Fixtures	
- Safe and strong rooms	10 years
Office Equipment	5 years
Electrical fittings	10 years
Buildings	30 years
Vehicles	10 years
Plant & Equipment	15 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Property plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in other income / expense in the statement of profit and loss in the year the asset is derecognised. The date of disposal of an item of property, plant and equipment is the date the recipient obtains control of that item in accordance with the requirements for determining when a performance obligation is satisfied in Ind AS 115.

5.7 Intangible assets

An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Company.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of an intangible asset comprises its purchase price and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is presented as a separate line item in the statement of profit and loss. Amortisation on assets acquired/sold during the year is recognised on a pro-rata basis to the Statement of Profit and Loss from / upto the date of acquisition/sale.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives. Intangible assets comprising of software are amortised on a straight-line basis over a period of 6 years, unless it has a shorter useful life.

The Company's intangible assets consist of computer software with definite life.

Gains or losses from derecognition of intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in the Statement of Profit and Loss when the asset is derecognised.

5.8 Provisions

Provisions are recognised when the enterprise has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

When the effect of the time value of money is material, the enterprise determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

5.9 Contingent Assets and Liabilities

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the entity. The Company does not recognize or disclose contingent asset in the financial statements.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

5.10 Earnings Per Share

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. In computing the diluted earnings per share, only potential equity shares that are dilutive and that either reduces the earnings per share or increases loss per share are included.

5.11 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (CODM).

The Board of Directors (BOD) of the Company assesses the financial performance and position of the Company, and makes strategic decisions. The BOD, which has been identified as being the chief operating decision maker. The Company is engaged in the business of i) Lending finance and ii) Fees & commission income. The said business are aggregated for the purpose of review of performance by CODM. Accordingly, the Company has concluded that the business of lending finance and fees & commission income to be the only reportable segment.

5.12 Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to Company's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

The Company as a lessee

The Company's lease asset classes primarily consist of leases for land and buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment of whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

6 Significant accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with the Ind AS requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosure and the disclosure of contingent liabilities, at the end of the reporting period. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

6.1 Defined employee benefit assets and liabilities

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate; future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed annually.

6.2 Impairment of loans portfolio

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

It has been the Company's policy to regularly review its ECL model in the context of actual loss experience and adjust when necessary.

In case, higher provisions are to be considered as per the prudential norms of the Reserve Bank of India, they are considered.

Expected Credit Loss:

As per Ind AS 109, the loan losses are to be provided based on ECL method. ECL is measured at 12-month ECL for Stage 1 loan assets and at Lifetime ECL for Stage 2 and Stage 3 loan assets. ECL is the product of the Probability of Default, Exposure at Default and Loss Given Default, i.e., $ECL = PD \times EAD \times LGD$

- **PD:** Probability of Default ("PD") is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognized and is still in the portfolio. The PD is computed for Stage 1, Stage 2 and Stage 3 independently by determining default rates based on the historical data after giving due weightage for abnormal period and events, probability of roll back etc.

- **EAD:** Exposure at Default ("EAD") is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected draw down on committed facilities, etc.

- **LGD:** Loss Given Default ("LGD") is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

6.3 Effective Interest Rate (EIR) method

The Company's EIR methodology, recognises interest income / expense using a rate of return that represents the best estimate of a constant rate of return over the expected behavioural life of loans given / taken and recognises the effect of potentially different interest rates at various stages and other characteristics of the product life cycle (including prepayments and penalty interest and charges).

Estimated amount of contracts remaining to be executed on capital account - Nil (Previous Year: Nil)

C. Leasing Arrangements

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116 (Leases). The standard prescribes the lessee to recognise Right of Use (ROU) assets and corresponding Lease Liabilities in its Balance Sheet for the entire period of the lease. For charging costs to the Profit & Loss Account, actual lease rentals are substituted with amortization of the ROU asset as well as a notional finance cost on the lease liability. Although the nature of expenses under leases has changed, this does not impact the Company's business or cash flows, which remains the same.

The discount rate is generally based on the incremental borrowing rate with similar tenure.

Note 36 Risk management

Risk is an integral part of the any business and sound risk management is critical to the success of any business venture. As a financial intermediary, the Company is exposed to risks that are particular to its lending and the environment within which it operates and primarily includes credit, liquidity and market risks. The Company has a risk management framework which covers risk associated with the financial assets and liabilities. The Board of Directors of the company are responsible for the overall risk management approach, approving risk management strategies and principles. The company have a risk management policy which covers all the risk associated with its assets and liabilities.

The main objective is to create and protect shareholder value by minimizing threats or losses and identifying and maximizing opportunities and thereby ensuring sustainable business growth with stability. The Risk Management systems also promote a pro-active approach in reporting, evaluating and resolving risks associated with the business.

Risk Management Framework

The Board of Directors and the Audit Committee are responsible for the overall risk management and for approving the risk management policies, strategies and principles so that the management controls the risks through properly defined processes

The Board plays a pivotal role in the effective management of the risk mitigation process within the Company. The Board is responsible for framing, implementing and monitoring the risk management plan and to ensure that appropriate systems for risk management are in place. The Audit Committee evaluates the internal financial controls and efficacy of the risk management systems, reviews all hedging strategies/risk treatment methodologies vis a vis compliance with the Risk Management Policy and relevant regulatory guidelines and ensures periodic review of operations and contingency plans and reports to Board in order to counter possibilities of adverse factors having a bearing on the risk management systems.

The Board has constituted the Risk Management Committee, which is responsible for monitoring the overall risk process within the Company. The Risk Management Committee has the responsibility to oversee the development, implementation and maintenance of the Company's overall risk management framework and its appetite, strategy, principles and policies, to ensure they are in line with emerging regulatory, corporate governance and industry best practice. The Risk Management Committee is responsible for managing risk decisions and monitoring risk levels.

Identification of Risk and Analysis

Risk identification and mitigation is obligatory on all verticals and functional heads who, with the inputs from their team members, are required to report the material risks to the concerned levels of the Company along with their considered views and recommendations for risk mitigation.

The Company has identified the following potential risks that could have an adverse impact on the Company:

1. Credit Risk
2. Operational Risk
3. Compliance Risk
4. Reputational Risk
5. Strategic Risk
6. Liquidity Risk

While each of the risk has significance, all except the Credit Risk can be managed and controlled through internal processes. It is the Credit Risk management which needs both internal and external factors in equal measure to be effective and controlled.

Credit Risk

This is the major risk anticipated in connection with the nature of operations of the company. While a lot would need to be done internally to monitor it and control it, the external factors also plays its role in the final impact of the credit risk. Credit risk is the risk of default or non-repayment of loan by a borrower, which involves monetary loss to the company, both in terms of principal and interest. In the portfolio of an NBFC, the losses stem from outright default due to the inability or unwillingness of a customer or counterparty to meet commitments in relation to repayment, trading, settlement and other financial transactions. Alternatively, losses result from reduction in portfolio value arising from actual or perceived deterioration in credit quality due to any event affecting the borrower/ a group of borrowers. The effective management and reporting of credit risk is a critical component of comprehensive risk management and is essential for the long-term success of any banking and financial services organization. It ensures that risks are identified in advance and corrective action taken. Credit risk management encompasses identification, measurement, monitoring, control and reporting of the credit risk exposures.

The major risk that the Company faces is the default and / or delay in payment of EMIs (principal and interest) by the customers within the due time. To mitigate the said risk, the Company measures the credit history, capacity to repay, loan amount and loan conditions and associated collateral, if any, of the customer before sanctioning/disbursing loan and has an efficient post disbursal monitoring mechanism to take corrective and timely action when ever required to minimise the probability of default/loss.

Liquidity Risk

Liquidity Risk arises largely due to maturity mismatch associated with assets and liabilities of the Company. Liquidity risk stems from the inability of the Company to fund increase in assets, manage unplanned changes in funding sources and meet financial commitments when required.

The table below provide details regarding the contractual maturities of significant financial assets and liabilities as on:-

In order to mitigate the impact of credit risk in the future profitability, the company makes reserves basis the expected credit loss (ECL) model for the outstanding loans as balance sheet date.

The below discussion describes the Company's approach for assessing impairment as stated in the significant accounting policies.

Methodology for assessment of Expected Credit loss on loan asset-Refer note on Impairment of Loans portfolio in significant accounting policies.

Asset & Liability Management

Asset and Liability Management (ALM) is defined as the practice of managing risks arising due to mismatches in the asset and liabilities. Company's funding consists of both long term as well as short term sources with different maturity patterns and varying interest rates. On the other hand, the asset book also comprises of loans of different duration and interest rates. Maturity mismatches are therefore common and has an impact on the liquidity and profitability of the company. It is necessary for Company's to monitor and manage the assets and liabilities in such a manner to minimize mismatches and keep them within reasonable limits.

The objective of this policy is to create an institutional mechanism to compute and monitor periodically the maturity pattern of the various liabilities and assets of Company to (a) ascertain in percentage terms the nature and extent of mismatch in different maturity buckets, especially the 1-30/31days bucket, which would indicate the structural liquidity (b) the extent and nature of cumulative mismatch in different buckets indicative of short term dynamic liquidity and (c) the residual maturity pattern of repricing of assets and liabilities which would show the likely impact of movement of interest rate in either direction on profitability. This policy will guide the ALM system in Company.

The scope of ALM function can be described as follows:

- Liquidity risk management
- Management of market risks
- Others

Financial instrument (continued)**Market Risk**

Market Risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market factor. Such changes in the values of financial instruments may result from changes in the interest rates, credit, liquidity, and other market changes. The objective of market risk management is to avoid excessive exposure of our earnings and equity to loss and reduce our exposure to the volatility inherent in financial instruments. The Company is primarily exposed to Interest rate risk as under.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The company is subject to interest rate risk, primarily since it lends to customers at fixed rates and for maturity periods different from the funding sources. Interest rates are highly sensitive to many factors beyond control, including the monetary policies of the Reserve Bank of India, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. In order to manage interest rate risk, the company seek to optimize borrowing profile between short-term and long-term loans. The company adopts funding strategies to ensure diversified resource-raising options to minimize cost and maximize stability of funds. Assets and liabilities are categorized into various time buckets based on their maturities and Asset Liability Management Committee supervise an interest rate sensitivity report periodically for assessment of interest rate risks. The Interest Rate Risk is mitigated by availing funds at very competitive rates through diversified borrowings and for different tenure

Operational and business risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to operate effectively, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Company cannot expect to eliminate all operational risks, but it endeavours to manage these risks through a control framework and by monitoring and responding to potential risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures and staff education.

Measurement of fair values**Valuation methodologies of financial instruments not measured at fair value**

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the financial statements. These fair values were calculated for disclosure purposes only.

Financial instrument (continued)**Short-term financial assets and liabilities**

The Company has not disclosed the fair values for financial instruments which are short term in nature because their carrying amounts are a reasonable approximation of fair value.

Borrowings

The debt securities, borrowings and subordinated liabilities are primarily variable rate instruments. Accordingly, the fair value has been assumed to be equal to the carrying amount.

Loans, Dealer trade advances and other receivables

The fair values of loans and receivables are estimated by discounted cash flow models that incorporate assumptions for credit risks, foreign exchange risk, probability of default and loss given default estimates.

Investments

Investment in preference shares had been taken as Level II.

Transfers between levels I and II

There has been no transfer in between level I and level II.

Capital management

The Company maintains an actively managed capital base to cover risks inherent in the business and is meeting the capital adequacy requirements of the local banking supervisor, Reserve Bank of India (RBI). The adequacy of the Company's capital is monitored using, among other measures, the regulations issued by RBI.

The Company has complied in full with all its externally imposed capital requirements over the reported period. Equity share capital and other equity are considered for the purpose of Company's capital management.

Capital management

The Company manages its capital to ensure that the Company will be able to continue as going concerns while maximizing the return to The primary objectives of the Company's capital management policy are to ensure that the Company complies with externally imposed

For the purpose of the Company's capital management, capital includes issued capital and other equity reserves. The primary objective The Company manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk

The company monitors capital using adjusted net debt (total borrowings net of cash and cash equivalents) to equity ratio.

Particulars	As at 31 March 2023	As at 31 March 2022
Gross debt	5,088.46	3,070.61

Financial instrument (continued)

The Company's exposure to credit risk for loans and advances by type of counterparty is as follows. All these exposures are within India.

Particulars	As at 31 March 2023	As at 31 March 2022
(I) Retail loans	6,161.41	3,651.38
Less : Impairment loss allowance	55.00	48.54
Total	6,106.41	3,602.84

An impairment analysis is performed at each reporting date based on the facts and circumstances existing on that date to identify expected losses on account of time value of money and credit risk. For the purposes of this analysis, the loan receivables are categorised into groups based on days past due. Each group is then assessed for impairment using the Expected Credit Loss (ECL) model as per the provisions of Ind AS 109 - financial instruments.

Staging:

As per the provision of Ind AS 109 general approach all financial instruments are allocated to stage 1 on initial recognition. However, if a significant increase in credit risk is identified at the reporting date compared with the initial recognition, then an instrument is transferred to stage 2. If there is objective evidence of impairment, then the asset is credit impaired and transferred to stage 3.

The Company considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments.

For financial assets in stage 1, the impairment calculated based on defaults that are possible in next twelve months, whereas for financial instrument in stage 2 and stage 3 the ECL calculation considers default event for the lifespan of the instrument.

As per Ind AS 109, Company assesses whether there is a significant increase in credit risk at the reporting date from the initial recognition. Company has staged the assets based on the Day past dues criteria and other market factors which significantly impacts the portfolio.

Days past dues status	Stage	Provisions
Current	Stage 1	12 Months Provision
1-60 Days	Stage 1	12 Months Provision
61-180 Days	Stage 2	Lifetime Provision
180+ Days	Stage 3	Lifetime Provision

Company's internal credit rating grades and staging criteria for loans are as follows:

Particulars	Loans Days past due (DPD) including the due date	Stages
Standard grade	No Overdue and 1- 60 DPD	Stage 1
Sub-standard grade	61-180 DPD	Stage 2
Non- performing Individually impaired	181 DPD or More	Stage 3

Expected credit loss ("ECL"):

ECL on financial assets is an unbiased probability weighted amount based out of possible outcomes after considering risk of credit loss even if probability is low. ECL is calculated based on the following components:

- Probability of default ("PD")
- Loss given default ("LGD")
- Exposure at default ("EAD")
- Discount factor ("D")

Probability of default:

PD is defined as the probability of whether borrowers will default on their obligations in the future.

LGD:

LGD is an estimate of the loss from a transaction given that a default occurs. Under Ind AS 109, lifetime LGD's are defined as a collection of LGD's estimates applicable to different future periods. Various approaches are available to compute the LGD. The Company has considered the workout LGD approach by considering the probable losses and recoveries as it doesn't have any historical data in this regard.

EAD:

As per Ind AS 109, EAD is estimation of the extent to which the financial entity may be exposed to counterparty in the event of default and at the time of counterparty's default. The Company has modelled EAD based on the contractual and behavioural cash flows till the lifetime of the loans considering the expected prepayments.

ECL computation:

Conditional ECL at DPD pool level was computed with the following method:

Conditional ECL for year (yt) = EAD (yt) * conditional PD (yt) * LGD (yt) * discount factor (yt)

The calculation is based on provision matrix which considers actual historical data adjusted appropriately for the future expectations and probabilities. Proportion of expected credit loss provided for across the stage is summarised below:

Stage	Provisions	As at 31 March 2023	As at 31 March 2022
Stage 1	12 month provision	0.50%	0.63%
Stage 2	Lifetime provision	4.01%	4.00%
Stage 3	Lifetime provision	40.00%	40.00%
Amount of expected credit loss provided for		55.00	48.54
